1. Organization

Trillion Energy International Inc. and its consolidated subsidiaries, (collectively referred to as the “Company”) is a Canadian based oil and gas exploration and production company. Effective January 2022, the corporate headquarters moved to Suite 700, 838 West Hastings Street, Vancouver, B.C., Canada from Turan Gunes Bulvari, Park Oran Ofis Plaza, 180-y, Daire:54, Kat:14, 06450, Oran, Cankaya, Ankara, Turkey. The Company also has a registered office in Canada. The Company is incorporated in British Columbia. The Company’s shares trade on the OTCQB under the symbol “TRLEF” and trade on the Canadian Securities Exchange (the “Exchange”) under the symbol “TCF”.

On January 21, 2022, the Company redomiciled from Delaware to a British Columbia corporation by way of an amalgamation transaction with the Company’s British Columbian subsidiary, Trillion Energy Inc. (the “Repatriation Transaction”). Pursuant to the Repatriation Transaction, for every one common stock of Trillion Energy International Inc., the shareholders will receive one common stock of Trillion Energy Inc. The Company will continue to operate and report under the name of Trillion Energy International Inc.

As a result of the Repatriation Transaction, the Company meets the definition of a foreign private issuer, as defined under Rule 3b-4 of the Securities Exchange Act of 1934, as amended.

On September 18, 2023, the Company consolidated its issued share capital on a ratio of five old common shares for every one new post-consolidated common share. All current and comparative references to the number of common shares, weighted average number of common shares, loss per share, stock options and warrants have been restated to give effect to this share consolidation (the “Share Consolidation”).

These condensed consolidated interim financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. As at March 31, 2025, the Company’s current liabilities exceeded its current assets by \$28,903,516 (December 31, 2024 – \$27,931,650) and its accumulated deficit amounts to \$51,813,806 (December 31, 2024 – \$54,009,488). For the three months ended March 31, 2025, cash provided by operating activities was \$462,943 (2024 – \$12,597 net cash used in operating activities). The Company’s continuation as a going concern is dependent upon its ability to complete financing sufficient to meet current and future obligations, the successful results from its business activities, and its ability to operate profitably and generate funds. Although the Company raised capital in previous reporting periods, additional funding will be required to continue current operations and further advance its existing oil and gas assets in the upcoming 12 months. These factors indicate the existence of material uncertainty which raises substantial doubt about the Company’s ability to continue as a going concern.

2. Material Accounting Policies**(a) Statement of Compliance and Basis of Presentation**

These unaudited condensed consolidated interim financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”) applicable to the preparation of condensed interim financial statements, including International Accounting Standards (“IAS”) 34, Interim Financial Reporting, as issued by the International Accounting Standards Board (“IASB”), and the Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). Accordingly, certain disclosures included in annual financial statements have been condensed or omitted and these unaudited condensed consolidated interim financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended December 31, 2024.

2. Material Accounting Policies (continued)

The Company's management makes judgments in its process of applying the Company's accounting policies in the preparation of its unaudited condensed consolidated interim financial statements. In addition, the preparation of the financial data requires that the Company's management make assumptions and estimates of the effects of uncertain future events on the carrying amounts of the Company's assets and liabilities at the end of the reporting period and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates as the estimation process is inherently uncertain. Estimates are reviewed on an ongoing basis based on historical experience and other factors that are considered to be relevant under the circumstances. Revisions to estimates and the resulting effects on the carrying amounts of the Company's assets and liabilities are accounted for prospectively. The critical judgments and estimates applied in the preparation of the Company's condensed consolidated interim financial statements are consistent with those applied and disclosed in the Company's consolidated financial statements for the year ended December 31, 2024. In addition, the accounting policies applied in these condensed consolidated interim financial statements are consistent with those applied and disclosed in the Company's audited financial statements for the year ended December 31, 2024.

These condensed consolidated interim financial statements were authorized for issue by the board of directors of the Company (the "Board of Directors") on May 30, 2025.

The condensed consolidated interim financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), effective as at January 1, 2024. The condensed consolidated interim financial statements are expressed in U.S. dollars. These condensed consolidated interim financial statements include the accounts of the Company and its wholly owned subsidiaries Park Place Energy Corp. ("PPE Corp."), Park Place Energy Bermuda ("PPE Bermuda"), BG Exploration EOOD ("BG Exploration"), and Park Place Energy Turkey ("PPE Turkey"). The Company's oil and gas operations are conducted jointly with its joint venture partner (Note 6). The joint arrangement meets the definition of a joint operation under IFRS 11, "Joint Arrangements" ("IFRS 11"); therefore, the Company's share of the assets, liabilities, revenues and expenses are recorded in the consolidated financial statements. All intercompany balances and transactions are eliminated on consolidation.

The functional currency of BG Exploration is the Bulgarian Lev. The functional currency of the Company's Turkish operations is the Turkish Lira ("₺"). The functional currency of the Company's Bermuda subsidiary is the United States dollar ("USD"), and the function currency of PPE Corp is the USD. Prior to January 1, 2022, the functional currency of Trillion Energy International Inc. was USD. The Company redomiciled from United States to Canada and became a Canadian Company in January 2022, resulting in the parent's expenditures being denominated primarily in Canadian dollar ("CAD") and the Company being funded primarily from issuance of equity instruments which proceeds are in CAD. As a result, the Company determined that the functional currency of the parent was changed to CAD effective January 1, 2022.

The Company has accounted for the change in functional currency prospectively with no impact of this change on prior period comparative information. The Company has made an accounting policy choice to reassess the classification of financial instruments as liabilities or equity or vice versa as applicable when the functional currency of the Company or its subsidiaries changes. The policy will be applied consistently in the future.

A portion of the Company's exploration and development activities are conducted jointly with others. The joint interests are accounted for on a proportionate consolidation basis and as a result the financial statements reflect only the Company's proportionate share of the assets, liabilities, revenues, expenses and cash flows from these activities.

Basis of Measurement

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for certain derivative liabilities, which are measured at fair value.

Hyperinflation

Due to various qualitative factors and developments with respect to the economic environment in Turkey, including but not limited to, the acceleration of multiple local inflation indices, the three-year cumulative inflation rate of the local Turkish wholesale price index exceeding 100% at the end of February 2022 and the significant devaluation of the Turkish Lira, Turkey has been designated a hyper-inflationary economy as of April 1, 2022 for accounting purposes.

Accordingly, IAS 29, Financial Reporting in Hyper-Inflationary Economies was adopted by the Company in its consolidated financial statements and applied to these consolidated financial statements in relation to PPE Turkey. The condensed consolidated interim financial statements are based on the historical cost approach in IAS 29.

The application of hyperinflation accounting requires restatement of PPE Turkey's non-monetary assets and liabilities, equity and comprehensive income (loss) items from the original transaction date when they were first recognized into the current purchasing power which reflects a general price index current at the end of the reporting period. To measure the impact of inflation on its financial statements and results, the Company has elected to use the consumer price index ("CPI") as published by the Turkish Statistical Institute "TURKSTAT".

IAS 29 also requires the restatement of comparative periods for the effects of hyperinflation unless the comparatives were previously presented in a different presentation currency of a non-hyperinflationary economy. The condensed consolidated interim financial statements of the Company are presented in US dollars, a stable currency, and as a result the comparative amounts do not require restatement.

On April 1, 2022, the Company recognized an adjustment of \$473,907 for the impact of hyperinflation within accumulated other comprehensive loss related to the non-monetary assets held by PPE Turkey, which have been restated from the historic date when they were first recognized to the beginning of the reporting period (the "Opening Hyperinflation Adjustment"). On initial adoption of IAS 29, there is an accounting policy choice to recognize the Opening Hyperinflation Adjustment directly to opening equity or to other comprehensive income and the Company has elected to recognize this amount directly to opening equity.

The value of the CPI at March 31, 2025, was 2,955 (December 31, 2024 - 2,685) and the movement in the CPI for the three months ended March 31, 2025 was 270 (2024 - 280), an increase of approximately 10% (2024 - 15%). As a result, the Company recognized a net monetary gain of \$4,637,618 for the three months ended March 31, 2025 (2024 - \$6,349,365) to restate transactions into a measuring unit current as of each period end.

6. Oil and Gas Properties (continued)*The South Akcakoca Sub-Basin ("SASB")*

The Company owns offshore production licenses called the South Akcakoca Sub-Basin ("SASB"). The Company owns a 49% working interest in SASB in partnership with TPAO. SASB has four producing fields, each with a production platform plus subsea pipelines that connect the fields to an onshore gas plant. The four SASB fields are located off the north coast of Turkey towards the western end of the Black Sea.

Impairment

Management assesses each field for impairment indicators at each reporting date. Impairment indicators considered include the following:

- Plans to discontinue or dispose of the asset before the previously expected date;
- Significant reductions in estimates or reserves;
- Significant cost overrun on a capital project;
- Significant increases in the expected cost of dismantling assets and restoring the site; and
- Production difficulties.

As at March 31, 2025, the Company performed an assessment of potential impairment indicators and noted that the Company's net asset value was greater than its market capitalization. As a result of the impairment indicator noted, the Company performed an impairment test in accordance with IFRS using fair value less cost to sell. For the purposes of testing impairment and determining value in use of the SASB property, the Company used a 15-year forecast of before-tax net cash flows on proved developed reserves (i.e. excluding proved undeveloped reserves) obtained from the annual reserve report discounted at 15% to estimate the value in use of the SASB property. The resulting recoverable amount exceeded the book values of the oil and gas properties and as such, no impairment charge was recognized as at March 31, 2025. As at March 31, 2025, the depletion calculation includes future development costs of \$31,400,000 (December 31, 2024 – \$31,400,000) based on the most recent reserve report.

As at December 31, 2024, the impairment test resulted in a \$9,892,000 impairment of the Company's SASB gas property and no impairment on the Cendere oil property. For the purposes of testing impairment and determining value in use of the SASB property, the Company used a 15-year forecast of before-tax net cash flows on proved developed reserves (i.e. excluding proved undeveloped reserves) obtained from the annual reserve report discounted at 15% to estimate the value in use of the SASB property. This resulted in a recoverable amount (value in use) of \$50,124,000. The pre-impairment carrying value of the SASB cash generating unit includes the net book value of the SASB property of \$60,016,000.

Sale of assets

During the year ended December 31, 2024, the Company sold tubing and casing with a cost of \$1,087,146 for proceeds of \$621,054, resulting in a loss of \$466,092. There were no sales during the three months ended March 31, 2025 and 2024.

- (1) On July 1, 2023, the Company entered into agreements with TR1 Master Fund to borrow \$1,065,000 and \$1,597,500. The loans were issued with a \$65,000 and \$97,500 discount, respectively, and bear an interest rate of 1% per month. The maturity date was December 31, 2023, and the Company is claiming that the principal of TR1 Master Fund agreed to extend the loans to December 31, 2024. In the event that the loan is repaid in full prior to the maturity date, the minimum interest payments on the loans are \$40,000 and \$60,000, respectively. If, during the period that any amount of the loan remains outstanding, the Company issues any equity, the Lender may demand repayment of all or part of the principal amount of the loan in an amount equal to the aggregate subscription price of the equity offering. Accrued interest in excess of the minimum interest payments of \$31,950 and \$47,925, respectively, were recorded during the three months ended March 31, 2025. The Company is currently in discussions with the lender and has not made any repayments as at the date of these condensed consolidated interim financial statements.

10. Leases (continued)

During the year ended December 31, 2024, the terms of the leases commencing February 1, 2023 and March 1, 2023 were modified and the Company recorded a modification to the lease liability and right-of-use asset of \$89,042 and \$46,120, respectively, and a gain on lease modification of \$42,922 (\$46,602 adjusted for hyperinflation).

During the three months ended March 31, 2025, \$9,347 (2024 – \$23,427) of short-term leases were expensed to the condensed consolidated interim statements of income (loss) and comprehensive income (loss).

11. Convertible debentures

On April 20, 2023, the Company entered into an agreement to issue 15,000 units of the Company (the “Units”) at a price of CAD\$1,000 per unit, for gross proceeds of CAD\$15,000,000 (USD\$11,135,145). Each Unit will consist of CAD\$1,000 (approximately USD\$742) principal amount secured convertible debenture (“Debenture”) and 333 common share purchase warrants of the Company (the “Warrants”). Each Warrant will be exercisable for one common share of the Company at an exercise price of CAD\$2.50 (approximately USD\$1.86 at initial recognition) and shall have an expiry date of June 29, 2025.

The Debentures will mature on April 30, 2025 (the “Maturity Date”) and will accrue interest at the rate of 12% per annum, payable semi-annually. The Company has the ability to redeem the Debentures at any time between the dates of April 30, 2024 and April 30, 2025 at a redemption price of 105% of the principal amount plus any accrued interest. At the holders’ option, the Debentures may be converted into common shares of the Company at any time, up to the earlier of the Maturity Date and the redemption of the Debentures, at a conversion price of CAD\$3.00 (approximately USD\$2.23 at initial recognition) per common share.

The convertible debentures were determined to be a financial instrument comprising a host debt component, a conversion feature classified as equity, and freestanding warrants classified as equity. The warrants and conversion features were determined to be equity components because the exercise prices are denominated in the functional currency of the Company. Thus, these components meet the criterion of an equity instrument.

The Company paid an underwriting fee of CAD\$1,045,000 (USD\$775,748) and issued 300,000 broker warrants (the “Broker Warrants”) in conjunction with the financing. The Broker Warrants are exercisable for one common share of the Company at an exercise price of CAD\$2.50 and shall have an expiry date of April 20, 2025. The fair value of the Broker Warrants was estimated to be \$216,777 and was determined using the Black-Scholes Option Pricing Model using the following assumptions: risk-free interest rate: 3.77%, expected volatility: 100.96%, dividend yield: 0% and expected life: 2 years.

On initial recognition, the proceeds were first allocated to the fair value of the host debt component, calculated using a market interest rate of 16%, which is the market interest rate of a debt instrument with similar terms but without the equity conversion feature. The residual proceeds were then allocated to the conversion feature and warrant equity components using the relative fair value method.

The relative fair value of the warrants and conversion features were determined using the Black-Scholes Option Pricing Model using the assumptions set out as follows:

	April 20, 2023
Risk-free interest rate	3.86%
Expected volatility	101.71 – 119.94%
Dividend yield	0%
Expected life	2.03– 2.19 years

During the year ended December 31, 2024, CAD\$1,000 (USD\$736) in convertible debentures were converted into 333 common shares at a conversion price of CAD\$3.00 (USD\$2.21).

11. Convertible debentures (continued)

A continuity schedule of the Company's convertible debt is as follows:

Balance as at December 31, 2023	\$ 10,329,719

Change in estimate	268,826	(611,700)
Ending balance	6,231,824	5,895,209

The Company's asset retirement obligations ("ARO") result from its interest in oil and gas assets including well sites. The total ARO is estimated based on the Company's net ownership interest in all sites, estimated costs to reclaim and abandon these wells and the estimated timing of the costs to be included in future years. The Company estimated the total undiscounted amount required to settle the ARO as at March 31, 2025 is \$16.5 million (December 31, 2024 – \$16.5 million). The ARO is calculated using an inflation rate of 2.5% (December 31, 2024 – 2.5%) and discounted using a risk-free rate of 4.45% (December 31, 2024 – 4.75%) between 10 and 20 years.

During 2023, the Company and TPAO agreed to establish a close out-fund (the "Close-Out Fund") in a US dollar bank account. The amounts accumulated in the Close-Out Fund will not be used for any purpose other than to cover the cost of close-out of the SASB project. The US dollar bank account is held by TPAO. Starting with the July 2023 natural gas revenue, each party agreed to transfer 10%

of its revenue into the Close-Out Fund on a monthly basis, until an amount agreed to by both parties is attained. The Company accounted for its share in the Close-Out Fund as a long-term deposit (Note 4). As at March 31, 2025, the Company share of the Close-Out Fund amounted to \$756,634 (December 31, 2024 – \$686,159).

15. Stock Options

The Board of Directors adopted the Trillion Energy International Inc. 2022 Long-Term Incentive Equity Plan (the "2022 Plan") effective as of December 1, 2022. The 2022 Plan permits grants of stock options and restricted stock awards and other stock-based awards.

Under the 2022 Plan, the maximum number of shares of authorized stock that may be delivered is 10% of the total number of shares of common stock issued and outstanding of the Company as determined on the applicable date of grant of an award under the 2022 Plan. Under the 2022 Plan, the exercise price of each option shall be determined by the Board of Directors, subject to any applicable Exchange approval or rules, at the time any option or other stock-based award is granted. In no event shall such exercise price be lower than the exercise price permitted by the Exchange. The vesting schedule for each option or other stock-based award shall be specified by the Board of Directors at the time of grant, subject to any applicable Exchange approval or rules.

21. Capital Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern to support its business plan, as well as to ensure that the Company is able to meet its financial obligations as they become due. The Company considers its capital for this purpose to be its equity, \$14,680,551 (December 31, 2024 – \$14,149,208).

The basis for the Company's capital structure is dependent on the Company's expected business growth and changes in business environment. To maintain or adjust the capital structure, the Company may issue new shares through private placement, incur debt or return capital to members.

The Company is dependent upon external financings to fund activities. In order to carry future projects and pay administrative costs, the Company will utilize its existing working capital and raise additional funds as needed. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital requirements.

22. Financial Instruments and Risk Management

The Company is exposed, through its operations, to the following financial risks:

- a) Market risk
- b) Credit risk
- c) Liquidity risk

The Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies, and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these consolidated financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous reported periods unless otherwise stated in the note. The overall objective of management is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below.

- a) Market risk

Market risk is the risk of loss that may arise from changes in market factors such as foreign currency exchange, interest rates and equity price risk.

Foreign currency risk:

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company and its subsidiaries are exposed to currency risk as it has transactions denominated in currencies that are different from their functional currencies. The Company does not hedge its exposure to fluctuations in foreign exchange rates.

22. Financial Instruments and Risk Management (continued)

As at March 31, 2025 and December 31, 2024, significant foreign exchange currency exposure on its financial instruments, expressed in USD was as follows:

	<u>March 31, 2025</u>	<u>December 31, 2024</u>
	\$	\$
Cash and cash equivalents	56,191	152,087
Accounts receivable	–	63,120
Accounts payable	(12,226,889)	(12,812,027)
Loans payable	(3,978,475)	(4,176,234)
Lease liability	(43,104)	(45,353)
Total	<u><u>(16,192,277)</u></u>	<u><u>(16,818,407)</u></u>

If the CAD strengthened or weakened against the USD by 10% the exchange rate fluctuation would impact net loss by \$1,619,228 at March 31, 2025 (December 31, 2024 – \$1,681,841).

Interest rate risk:

Interest rate risk is the risk that future cash flows will fluctuate because of changes in market interest rates. The interest earned on cash is insignificant and the Company does not rely on interest income to fund its operations. The Company does not have significant debt facilities with variable interest rates and is therefore not exposed to interest rate risk.

Other price risk:

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The Company does not hold equity investments in other entities and therefore is not exposed to a significant risk.

b) Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations.

The Company is subject to credit risk on its cash and cash equivalents and amounts receivable which consists primarily of trade receivables and notes and amounts receivable for equity issued. The Company limits its exposure to credit loss on cash and cash equivalents by placing its cash with a high-quality financial institution. Exposure to credit loss notes and amounts receivable for equity issued is limited by entering into these types of transactions with related parties and entities that are well known to the Company.

The Company only has two customers. The Company mitigates credit risk by evaluating the creditworthiness of customers prior to conducting business with them and monitoring its exposure for credit losses with existing customers. One of the customers is the largest oil refinery in Turkey. The other customer provides letters of credit to be used by the Company in the event of default. As at March 31, 2025, all of the Company's trade receivables are current (< 30 days outstanding).

The Company's maximum credit exposure is \$1,200,677 (December 31, 2024 – \$2,051,297).

22. Financial Instruments and Risk Management (continued)

c) Liquidity risk

Liquidity risk arises from the Company's general and capital financing needs. The Company continuously monitors and reviews both actual and forecasted cash flows, and also matches the maturity profile of financial assets and liabilities, when feasible. The Company anticipates increases in revenue in future periods resulting from the completion of an additional well subsequent to the period end. Historically, the Company's sources of funding has been through equity and debt financings. The Company's access to financing is uncertain. There can be no assurance of continued access to significant debt or equity funding.

The table below summarizes the maturity profile of the Company's contractual cashflows.

As at March 31, 2025	Less than 1 year	1 – 2 years	Later than 2 years	Total

24. Commitments and ContingenciesClose-out Fund

The Company has committed to contribute to the Close-Out Fund (Note 12) where it has deposited 10% of natural gas revenue from the SASB project into the Close-Out Fund until an amount agreed to by both parties is attained.

Arbitration

The Company through its' subsidiary PPE Turkey has advanced arbitration against an offshore drilling rig contractor for \$20.3 million for gross negligent and breach of contract involving health and safety issues during the prior year drilling program resulting in loss and damages to Company (the "Trillion Losses"). Liability is not admitted, the litigation is at the inception, and thus, legal counsel has advised that it is too soon to predict the outcome or the quantum of damages that will be assessed. The Company is confident that its case has merit. In accordance with guidance for contingent assets and liabilities, no provision for any potential recovery of the Trillion Losses will be made until recovery is virtually certain. If the Company's claim is successful, the award will exceed the amount, if any, that is payable to the drilling contractor in its claim.

The Company's subsidiary PPE Turkey is defending an action brought by the same drilling contractor in Europe to which it has advanced an arbitration claim, for drilling services seeking \$3 million. This amount has fully been recorded in accounts payable in accordance with guidance as there is significant uncertainty as to the outcome of the arbitration.

Third party liability claim

The Company has included in accounts payable and accrued liabilities a potential liability for an invoice in the amount of \$144,247, issued to a 3rd party with whom the Company previously had a farm-in arrangement. The vendor is claiming that the Company is liable given the previous relationship.

Dispute with former employees

The Company has filed claims against, and has received counter claims from, former employees. This dispute is ongoing, and the outcome cannot be predicted at this time.

25. Subsequent events

Subsequent to year-end, the Company amended the terms of its convertible debentures as follows:

- Maturity date extended from April 30, 2025 to July 31, 2025;
- Semi-annual interest due on April 30, 2025 is now authorized to be paid in cash or common shares of the Company at a deemed price of CAD\$0.03 per share;
- As a result of the amendment to the maturity date, the debenture holders will receive an extension fee in the aggregate amount of CAD\$85,000 payable in common shares of the Company at price of CAD\$0.033 per share;
- As a result of the amendment to the maturity date to July 31, 2025, the convertible debentures will continue to bear interest from May 1, 2025 to July 31, 2025 at a rate of 12% per annum, payable in cash.

On April 30, 2025, the Company issued 30,622,615 common shares to repay accrued interest on the convertible debentures.
